

Crossfire

ball dispenser credit card system

....an e-Range product

Accept Credit Cards, Gift Cards & Cash Right at your Ball Dispenser!

Crossfire is recognized as a leading solution for wireless credit card, gift card and cash acceptance for golf ball dispensers. It installs easily into your existing golf ball dispenser, or it can be added to your new dispenser.

Crossfire allows you to convert any single size dispenser to 3 sizes.

With Crossfire, you now have the ability to accept Credit cards, ETS gift cards and Cash right at your dispenser. Crossfire is PCI complaint giving you quick, secure transactions with the lowest fees, and batch deposits every day.

Accept Credit Cards & Gift Cards

Crossfire accepts all major credit cards as well as ETS gift cards*.

Gift cards can be customized with your logo, and are free through ETS.

PN: 10-9000 KIT

* Must have an e-Range giftcard licence to use ETS giftcards

Accept Credit Cards, Gift Cards & Cash

NEW

As well as accepting credit and gift cards, Crossfire can now accept cash at your ball machine without the use of an accumulator board, or an e-Range reader.

Site Requirements

What is needed at the Location?

The Crossfire credit card hardware requires:

- A computer with a high speed internet connection to 'listen' to the credit card reader at the ball dispenser
- An unused USB port on the internet connected computer
- The ball dispenser must be environmentally protected against direct sunlight, rain and snow
- A receipt printer if you wish to print or reprint ball dispenser receipts
- A merchant account with ETS Corporation, Card Connect, or First Data
- Line of sight from the ball dispenser to the internet connected computer is preferred for better signal. Obstructions will reduce the distance from over 2000 feet to less than 500

Dispenser Requirements

What is needed in the dispenser?

- 120 VAC outlet inside the ball dispenser
- A hole cutout - standard size and bolt pattern used by a bill validator (4" x 4.25")
- Environmentally clean space inside the dispenser for the additional hardware
- Environmentally protected - dispenser should be in a shed or at least protected from direct exposure to the elements, especially direct sunlight

Wireless Limitations

How far away can the dispenser be?

- Effective wireless range differs with each installation depending on obstructions and electrical interference.
- Clear line of sight from the dispenser to the internet connected computer extends the range significantly.
- Range is 300 feet with obstructions present.
- Range is 1000-2000 feet with limited, or no obstructions.
